

WWARN Informatics

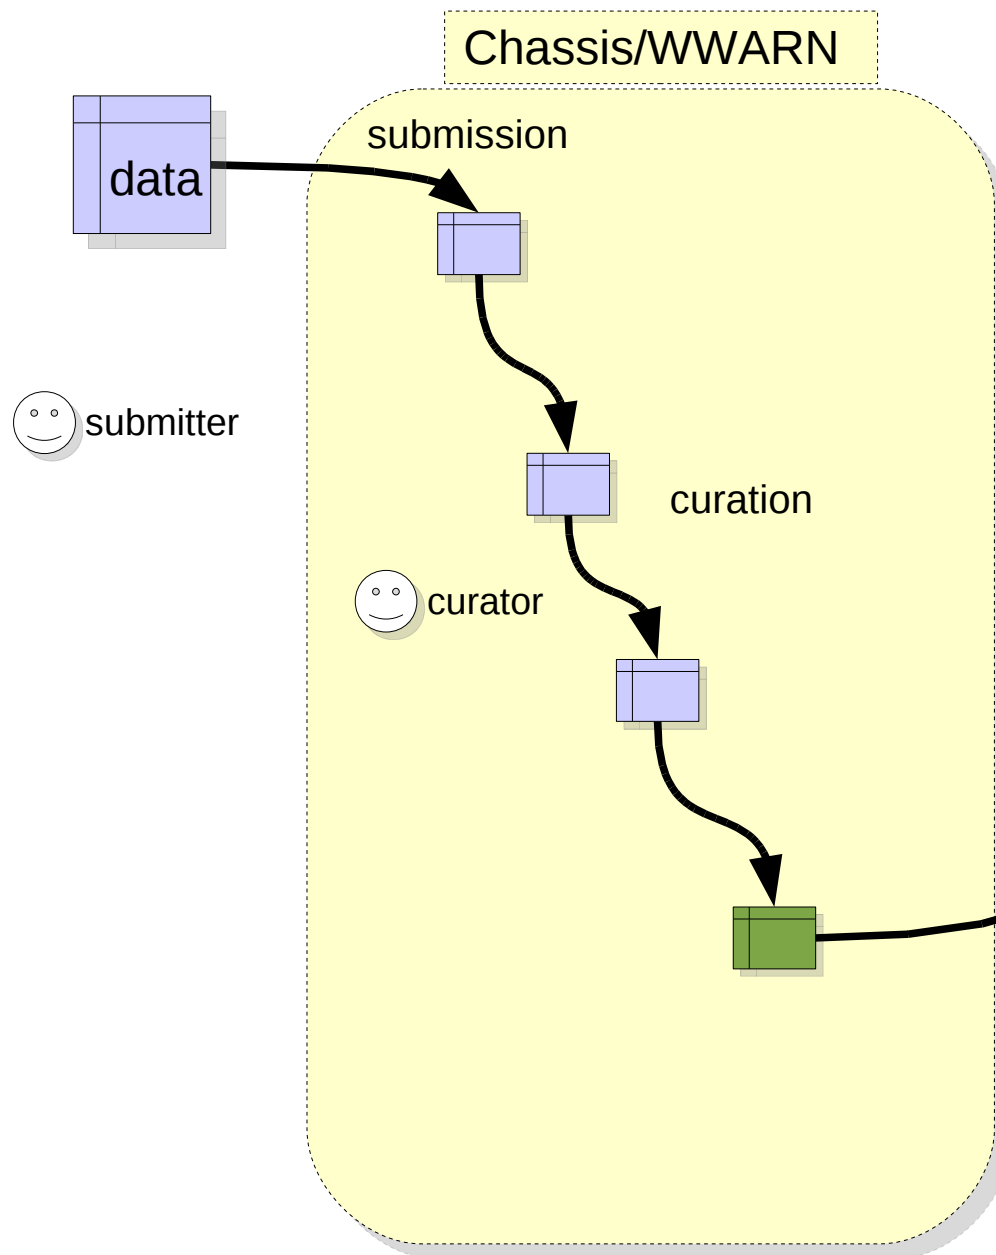

Overview & Roadmap

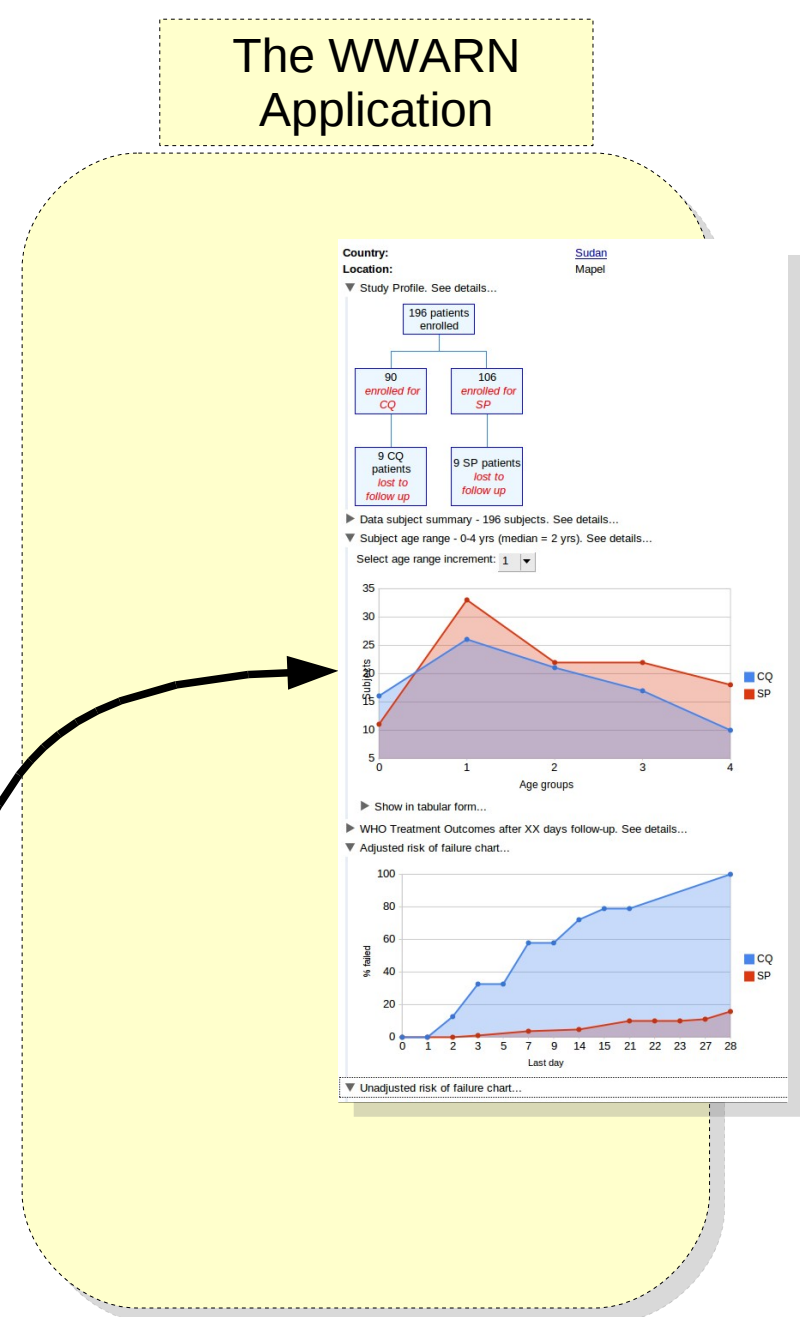

?

- data could be submitted in any format
- enable submitter to view standard analyses & outputs for their data
- enable aggregation of data across studies
- need at least to **curate data** into a standard structure

- system for **data management** = submission & curation of data

- system for analysing, visualising and reporting curated data

Chassis/WWARN

- Enables upload of data in any format
- Provides framework for curation
- Captures complete audit trail
- Manage privacy
- Manage quality

The WWARN Application

- Enables visualisation, analysis & reporting for curated data
- ...

Roadmap

- **Release early and often**
 - Release production quality versions of Chassis/WWARN & The WWARN Application, with **limited functionality, ASAP**
 - Add more functionality **incrementally**, in subsequent releases, **as often as possible**

Roadmap - Chassis/WWARN

- Chassis/WWARN 1.0 Release
 - First production release
 - As soon as possible (aim, early 2010)
 - Establish WWARN data management operational framework, i.e., workflow, roles & responsibilities
 - Bare minimum to enable WWARN data management operations to begin
- Chassis/WWARN 1.1, 1.2, 1.3, ...
 - Subsequent releases (as often as possible) add support for curation of data (e.g., validation, transformation, ...?)

Roadmap - The WWARN Application

- The WWARN Application, 1.0 Release
 - First production release
 - As soon as possible (aim, early 2010)
 - Curated data from Chassis/WWARN 1.0
 - Essential visualisation, analysis and reporting functionality only
- The WWARN Application, 1.1, 1.2, 1.3, ...
 - Subsequent releases, as often as possible, adding functionality

Roadmap (short-term)

- Chassis/WWARN 0.1
 - Limited functionality to enable submission of data in WHO format only
 - ASAP (aim, this year)
- The WWARN Application Preview Release
 - Showcase future potential, using existing data
 - ASAP (aim, this year)
