WWARN Explorer Preview Release

Final change requests and additional data from modules (incl. review text & supply explanations) 24/3 (all modules)

- Check that for each study, place, year, number of patients, output in acceptable range (all modules)

- Compare outputs in WWARN explorer with published results, and resolve any discrepancies (Sarah)

- All modules give final approval 31/3

- Release to SAC 31/3

- Communication plan & template for elicitation of feedback from SAC (led by comms)

- Modules implement communication plan

- Deal with any red alerts/vetos

- Public release

- Communication plan for follow-up to public release (led by modules)

- Integration with WWARN website

Chassis Submission System Public Release

- SSQ final drafts from each module 26/3 (all modules)
- Submission system final change requests 26/3
- SSQ final approval 23/4
- Terms of submission final draft 23/4
- Submission system final approval from modules 30/4
- Communication plan for limited release
- Limited release (*Audience TBD, TAG?*)
- Implement communication plan for limited release
- Deal with any red alerts/vetos
- Public release 17/5
- Communication plan for follow-up to public release
- Data submission FAQ on website
- Integration with website

Trial Submission, Curation & Analysis Activity

- agree WWARN standard file format (access db + dictionary) trial version 31/3

- Patrice mapper trial version including adaptations for all other modules 21/5

- agree data quality checks for trial 31/4 (includes what to check, and what to do about it)

- Chassis curation audit trail system trial version 31/5

- agree plans of analysis for trial 31/5

- agree which datasets will be used for trial 31/5 (although, maybe include datasets received from Dakar attendees?)

- completed trial submission/curation/analysis activity 30/6

WWARN Explorer Version 1

- agree WWARN standard file format (access db + dictionary) version 1 31/7

- Patrice mapper version 1 31/7

- agree data quality checks version 1 31/7

- Chassis curation audit trail system version 1 31/7

- agree plans of analysis and outputs version 1 31/7

- ---- BEGIN REAL CURATION ----

- submission, curation and analysis of agreed datasets to version 1 standards

- WWARN explorer version 1 goes live & replaces preview version (end 2010)

  - implements plans of analysis version 1

  - ingests curated data from chassis

Other Stuff

- New Website Launch (June)
  - Modules give input and feedback on audiences (personas) (not immediately, wait to hear from Val/Rachel)
  - Modules provide text as required
  - Modules approve site map and text
  - get initial list of protocols and SOPs (Freda)
  - prioritise list of protocols and SOPs
  - worldwide dhfr/dhps map, discuss new features with CR (in May?)
- history spread of resistance map updated with missing countries for presentations only (not on web)
- comparison of 3d7 in vitro data (all drugs) between several labs, want to publish a report on the (old) website (part of in vitro module)
- any crucial workshops in 2010 to be organised by scientific coordinators (clinical module, Liberia, regional, ...), training material (e.g., videos) -- send proposals to Freda
- Pharmacology TAG meeting late in 2010
- In Vitro TAG meeting in November, for validation of protocols and SOPs, possibly -- to be reassessed in June, as part of work on communication plan
- develop quality assurance plans for each module and harmonise them in highly visible single communication on website (data quality) -- Freda to create template to capture what QA information will be provided by each module this year (could be description of work in progress)

Meetings

- coordinators meeting in Dakar -- arrange days to meet

- organise another f2f working session with coordinators and some heads of modules, July/August in Oxford -- arrange date and venue
